

I/O Wired Modules and Kits End of Life (EOL) for Russia

May 2021

(Please forward onto the relevant parties in your organization)

The System Sensor M200 wired range of Input/ Output modules has been redesigned to address its microcontroller obsolescence and grant full backward-compatibility.

CPR certificate on new I/O modules has been issued by Intertek and received on 1st April 2021, thus releasing production and starting the delivery of the new P/N (see Table 1 below) in countries where CPR only is needed to sell (VdS and Bosc are in progress).
